Executive Summary Report

November 16, 2025 - 17:30

Report Summary

Total Interactions: 54

Work Items Completed: 7

Key Decisions: 7

Problems Resolved: 2

Action Items: 5

Detailed Analysis

Work Completed

- [v] RFP-0029 generated for 2000 laptops.
- [v] Email sent to ai.abhyuday@gmail.com with RFP-0029 attached.
- [v] Auction AUC-0001 scheduled for 'Procurement of 2000 Laptops' with a base price of Rs.300,000.
- [v] Manual invitations sent to 5 vendors for Auction AUC-0001.
- [v] Auction AUC-0002 scheduled for 'Procurement of 2000 Laptops (Second Round)' with a base price of Rs.250,000.
- [v] RFP-0028 generated for 5000 Arduino Uno Boards.
- [v] Email sent to veezorobotics@gmail.com with RFP-0028 attached.

Key Decisions

- [>] Finalized RFP terms for 2000 laptops, including delivery by November 20, 2024, and specific technical requirements.
- [>] Set base price for Auction AUC-0001 at Rs.300,000 and selected `manual\_decrement` as the auction type.
- [>] Excluded Govind Mehta from the vendor invitation list for Auction AUC-0001.
- [>] Set base price for Auction AUC-0002 (second round) at Rs.250,000, scheduled for November 20, 2025.
- [>] Finalized RFQ terms for 5000 Arduino Uno boards, including contact details (Abhyuday, cosmiccurators@gmail.com, Cosmic Tech).
- [>] Set base price for the upcoming Arduino board auction at Rs.500,000 and selected `manual\_decrement` as the auction type.
- [>] Set the title for the upcoming Arduino board auction as 'need arduino'.

Problems Solved

- [v] Circumvented initial automatic email invitation failure for Auction AUC-0001 by sending manual invitations to 5 vendors.
- [v] Resolved a 'Gmail integration is not found or inactive' error, enabling the sending of RFP-0028 to veezorobotics@gmail.com.

Key Insights

- (*) A recurring system error ('Cannot read properties of undefined (reading 'invoke')') prevents automatic email invitations for custom vendors in auctions, necessitating manual follow-up.
- (*) The live auction AUC-0001 demonstrated active bidding, with the current price dropping to Rs.250,000 from a base of Rs.300,000.
- (*) The assistant proactively structures requests for quotations (RFQs) to ensure comprehensive information is gathered before sending.
- (*) The system can efficiently retrieve vendor email addresses from a database, streamlining the invitation process for known vendors.

Action Items & Next Steps

- [] Send manual invitations to vendors for Auction AUC-0002 due to the recurring email system failure.
- [] Provide a brief description for the upcoming Arduino Uno board auction.
- [] Confirm the full vendor name for `veezorobotics@gmail.com` (e.g., 'Veezo Robotics' or 'Veezo') to add them to the database.
- [] Schedule the new auction for Arduino Uno boards once all required details are provided.
- [] Investigate and resolve the underlying 'Cannot read properties of undefined (reading 'invoke')' error affecting automated auction invitations.
